*Dobrush  
Porcelain*

*Dobrush is a little Venice in Belarus.  
Clean air, drowning in the green of  
the house, sincere people.  
No wonder porcelain is here produce for  
the soul and celebration too.*

## Porcelain

1. Porcelain tableware is in first place in terms of strength among all types of ceramics (the firing temperature of porcelain is higher than the melting point of gold, silver, copper, cast iron and other metals);
2. around the world, porcelain is recognized as the safest and most environmentally friendly clean;
3. the smell does not absorb on porcelain surface , bacteria does not multiply on its surface;
4. porcelain products are practical, graceful and convenient to use;
5. porcelain keeps dishes warm for a long time;
6. the possibility of high-temperature disinfection;
7. the porcelain items have no expiration date, stored for centuries.

## About us

JSC «Dobrush Porcelain Factory» is the largest domestic manufacturer of porcelain in the CIS countries. The company has more than for 40 years it has been producing high-quality, environmentally friendly products from a wide range of porcelain: plates, salad bowls, bowls, mugs, tea pairs, various sets, sets and much more. Products comply international quality standards.

Our main sales markets are Belarus and Russia, as well as products from Dobrush supplied to the USA, Germany, France, Poland, Kazakhstan, Azerbaijan, Uzbekistan, Armenia and other countries.

Exports are over 80%.

The enterprise produces about 25 million pieces per year.

The number of employees is 1000 people.

# Our production

The products are manufactured on the modern equipment:

- the european energy-saving high-high-speed kilns of the Czech company "GRUN" for I and II firing ,
- the kilns for decal firing and painting drawings firing,
- the universal chamber kiln.

New kilns have significantly reduced the energy costs, and increase the labor productivity.

An important stage in the modernization of the enterprise is installation of 8 isostatic presses of a German company «SAMA Maschinenbau GmbH», designed for dry pressing of the flat products of various shapes from the porcelain press powder.

The equipment performance over 1.8 million pieces per month.

The new equipment allows Dobrush Porcelain Factory take the orders not only for the most various forms of the customer, but also the orders for products made from the foreign raw materials.

Improving the production process, JSC «Dobrush Porcelain Factory» continued modernization:

- the automated lines for porcelain casting products in plaster forms of the French manufacturer «Cerinnov» equipment allowed to increase production especially popular products and reduce the share of manual work.
- the glazing machines of the German company "SAMA Maschinenbau GmbH" helped to automate the stage of coating products with glaze and significantly increased productivity.

The company also installed the following equipment:

- for grinding of legs of articles,
- for paint decoration.
