

## COMMERCIAL OFFER

The Belarusian unitary manufacturing enterprise “SVETOTECHNIKA” is a part of the “Belarusian Visually handicapped Public Association” and bears significant social functions because its staff includes over 62% of visually handicapped employees.

Our enterprise production range includes the whole scale of lighting appliances for administrative, social, educational, medical and industrial premises, street and park-and-garden lighting, energy-efficient, diode, dust and water proof light spots. Our branch in Mozyr produces a wide range of switchboard equipment for completing houses under construction according to technical specifications of construction organizations.

The enterprise is the only Belarusian manufacturer of seats and chairs for the entertainment and sports objects. Our production is widely spread among the Belarusian sports arenas and entertainment areas. We have an over 16 years experience in this field. Our production is made with the unique modern expelling technology and meets the contemporary world’s highest standards in design and quality. The production is mainly designed for stadiums, athletics arenas, amphitheatres, railway stations and other public objects. It can also be used for mobile platforms quick mounting and dismounting in frames of various indoor and outdoor events holding.

The seats are safe and have a proper environmental and anti-vandal protection. No sharp or cutting particles causing injures or discomfort can occur while exploitation. Due to the air inflation technology the seats have low thermal conductivity providing high comfort for the audience.

We have already supplied numerous Belarusian sports and cultural institutions with over 300 thousand seats made by our manufacturing capacities.

We also produce a wide range of garden and horticultural tools: pneumatic sprayers, orchard houses, seeds caps, drip watering systems, hoses, nozzles, landscape design elements (paving flagstones, decorative edge curbs) etc.

In 2014 the enterprise launched a new production line making kids sledges of various types and purposes. The production is made in accordance with the German design and has unique comfort and exploitation characteristics.

In addition to serially made goods the enterprise is ready to provide the customers with other products in accordance with their demands and requirements at the prompt term.

The enterprise also provides a wide range of other services including die-molds and die-blocks production, metal processing, cold forming, electrochemical plating, welding, powder coating, molding, plastics expelling, polymeric materials extruding etc.

In accordance with the Belarusian legislation while holding tenders, electronic auctions, procedures for requesting price proposals to the bid price of the participant a preferential correction is applicable: 25% - in case if offered goods (works, services) of their own production by organizations in which the number of disabled people is at least 50% of the payroll number of employees.

The enterprise production is exempted from VAT paying on the territory of the Republic of Belarus in accordance with the relevant Belarusian tax law.

In addition we inform you that, following the relevant Belarusian legal acts regulating the employers with the share of disabled persons among their staff over 50%, our production can be purchased without tender procedure.
